1. IDENTIFICATION OF THE MATERIAL AND SUPPLIER

Product name: Dropp® Ultra Cotton Defoliant

Other names: None

Product codes and pack sizes: 4171097 (5 L)

Chemical group: Phenylurea / Urea

Recommended use: Plant growth regulator and herbicide for agricultural use

Formulation: Suspension concentrate (SC)

Supplier: Bayer CropScience Pty Ltd   ABN 87 000 226 022

Address: 391 - 393 Tooronga Road, East Hawthorn Victoria 3123, Australia

Telephone: (03) 9248 6888

Facsimile: (03) 9248 6800

Website: www.bayercropscience.com.au

Contact: Development Manager (03) 9248 6888

Emergency Telephone Number: 1800 033 111 – Orica SH&E Shared Services

2. HAZARDS IDENTIFICATION

**EMERGENCY OVERVIEW**

HAZARDOUS SUBSTANCE – NON-DANGEROUS GOOD (road/rail)
Dangerous to aquatic organisms

Risk phrases: R36/38 – Irritating to eyes and skin.
R40 – Limited evidence of a carcinogenic effect.
R43 – May cause sensitisation by skin contact.

Safety phrases: See Sections 4, 5, 6, 7, 8, 10, 12, 13

ADG classification: Not a “Dangerous good” for transport by road or rail according to the Australian Code for the Transport of Dangerous Goods by Road and Rail. If transported by sea this product is a Class 9 Marine Pollutant. See Section 14.

SUSDP classification: Exempt (Standard for the Uniform Scheduling of Drugs and Poisons)

3. COMPOSITION / INFORMATION ON INGREDIENTS

### 4. FIRST AID MEASURES

<table>
<thead>
<tr>
<th>If poisoning occurs, immediately contact a doctor or Poisons Information Centre (telephone 13 11 26), and follow the advice given. Show this Material Safety Data Sheet to the doctor.</th>
</tr>
</thead>
</table>

**Inhalation**
If inhaled remove to fresh air and keep at rest. If signs of poisoning occur obtain medical aid immediately.

**Skin contact**
Carefully remove contaminated clothing. Wash affected areas with soap and water. Seek medical aid if skin problems persist.

**Eye contact**
Rinse eyes immediately with clean water and obtain medical advice.

**Ingestion**
Wash out mouth with water. Do not induce vomiting. Keep patient at rest and seek immediate medical advice as above.

**First Aid Facilities**
Ensure eyewash and shower facilities are available.

**Medical attention**

*Symptoms of poisoning:*
Gastrointestinal discomfort, eye and mucous membrane irritation, erythema, sensitisation, cyanosis. Absorption of diuron into the body may lead to the formation of methaemoglobin, which in sufficient concentration causes cyanosis (blueness of the skin from lack of oxygen in the blood). If a large amount of this product has been ingested other symptoms include apathy, dizziness and headache.

*Local Treatment:*
Treat symptoms. Treat skin and mucous membranes with antihistamines and corticosteroids.

*Systemic Treatment:*
If more than a mouthful has been ingested, the following measures should be considered:
- Monitoring of: cardiac and kidney function and red blood cell count
- Observe specific parameters: methaemoglobinemia and serum potassium
- If ingested, irrigate the stomach, followed by administration of activated charcoal.
- If methaemoglobin level is less than 20%, administer 100% oxygen.
- If methaemoglobin level is greater than 20%, treat with 100% oxygen and slowly give 1% Methylene Blue/Toluidine Blue solution intravenously, 1-2 mg/kg body weight.

*Contraindications:*
Alcohol

*Recovery:*
Spontaneous

### 5. FIRE FIGHTING MEASURES

**Extinguishing media**
Water spray, alcohol-resistant foam, dry chemical, carbon dioxide

**Hazards from combustion products**
In a fire, formation of hydrogen chloride, sulphur dioxide, hydrogen cyanide, carbon monoxide and nitrogen oxides can be expected.

**Precautions for fire fighters**
Fire fighters should wear full protective gear, including self-contained breathing apparatus (AS/NZS 1715/1716). Keep unnecessary people away. If it can be done safely, remove intact containers from the fire. Otherwise, spray with water to keep cool. Bund area with sand or earth to prevent contamination of drains or waterways. Dispose of extinguishing agent and spillage safely later.

**Hazchem code**
Not applicable
6. ACCIDENTAL RELEASE MEASURES

Avoid contact with spilled material or contaminated surfaces. Do not smoke, eat or drink during the clean up process. Wear personal protective clothing and equipment as detailed in Section 8 PERSONAL PROTECTION. Keep people and animals away. Prevent spilled material from entering drains or watercourses. Absorb spill with absorbent material, sweep up and collect and store in properly labelled drums for disposal. Seal drums and label ready for safe disposal. Deal with all spillages immediately. If contamination of drains, streams, watercourses etc. is unavoidable, warn the local water authority.

7. HANDLING AND STORAGE

Handling

Keep out of reach of children. Will irritate eyes and skin. Avoid contact with eyes and skin. Wash hands after use. After each day’s use, wash gloves and contaminated clothing.

Storage

Store in the closed, original container in a dry, cool, well-ventilated area out of direct sunlight. Protect from heat and from frost. Prevent any penetration into the ground.

Flammability

Class C1 Combustible liquid – flash point between 61 and 150° C.

8. EXPOSURE CONTROLS / PERSONAL PROTECTION

Exposure standards

NOHSC Exposure standard for diuron: TWA: 10 mg/m³.
ACGIH TLV TWA for diuron: 10 mg/m³.

Definitions:

Exposure standard – Time Weighted Average (TWA) means the average airborne concentration of a particular substance when calculated over a normal eight-hour working day, for a five-day working week.

TLV = Threshold Limit Value
ACGIH = American Conference of Governmental Industrial Hygienists

Biological limit values

None allocated

Engineering controls

Control process conditions to avoid contact. Use in a well-ventilated area only.

Personal Protective Equipment

Eyes: Wear chemical resistant goggles if exposure is likely.
Clothing: Cotton overalls buttoned to the neck and wrist and a washable hat
Gloves: Elbow-length PVC or nitrile gloves
Respiratory: Wear an AS/NZS 1715/1716 approved respirator suitable for organic vapour/mist if exposure to vapours or mists is likely.
9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance: Beige liquid
Odour: Slight or weak, rancid
pH: 7.1 at 20°C
Vapour pressure: 4 x 10⁻⁶ mPa at 25°C (thidiazuron); 1.1 x 10⁻³ mPa at 25°C (diuron)
Vapour density: Not available
Boiling point: Not available
Freezing/melting point: Not available
Solubility: Miscible with water.
Density: Approximately 1.01 g/mL at 20°C
Flash Point: 143.5°C
Flammability (explosive) limits: Not available.
Auto-ignition temperature: Not available
Partition coefficient (octanol/water): Thidiazuron: Log P_{ow} = 1.5; Diuron: Log P_{ow} = 2.85 at 25°C

10. STABILITY AND REACTIVITY

Chemical stability Stable under normal conditions of use.
Conditions to avoid Extremes of temperature and direct sunlight.
Incompatible materials Diuron is hydrolysed by acids or alkalis. Avoid oxidising agents.
Hazardous decomposition products In a fire, formation of hydrogen chloride, sulphur dioxide, hydrogen cyanide, carbon monoxide and nitrogen oxides can be expected.
Hazardous reactions None known

11. TOXICOLOGICAL INFORMATION

POTENTIAL HEALTH EFFECTS

Inhalation Harmful if inhaled. Inhalation of spray may irritate mucous membranes.
Skin contact Will irritate the skin.
Eye contact Will irritate the eyes.
Ingestion Harmful if swallowed.
11. TOXICOLOGICAL INFORMATION - continued

**ANIMAL TOXICITY DATA**

**Acute:**

**Oral toxicity**

LD$_{50}$ rat:  > 5000 mg/kg

**Dermal toxicity**

LD$_{50}$ rat:  > 4000 mg/kg

**Inhalation toxicity**

LC$_{50}$ rat (4 hour):  > 1.85 mg/L (highest attainable concentration)
Determined in the form of a respirable aerosol.
Not relevant because of low vapour pressure.

**Skin irritation**

Irritating (rabbit)

**Eye irritation**

Irritating (rabbit)

**Sensitisation**

Sensitising (guinea pig)

**Chronic:**

Thidiazuron was not carcinogenic, was not mutagenic and did not cause reproductive effects or teratogenicity in animal studies.

Diuron was not mutagenic in the Ames test. Long term animal studies with diuron at high doses gave evidence of blood disorders and a possible carcinogenic effect. Diuron is not listed by The National Toxicology Program or the International Agency for Research on Cancer as a carcinogen.

12. ECOLOGICAL INFORMATION

Thidiazuron is toxic to aquatic organisms. Diuron is moderately toxic to fish and highly toxic to aquatic invertebrates and algae. Thidiazuron and diuron have low toxicity to birds and bees.

DO NOT contaminate streams, rivers, or waterways with the chemical or used containers.

**Ecotoxicity**

**Thidiazuron:**

- **Fish toxicity:** LC$_{50}$ (96 h) rainbow trout (*Onchorhynchus mykiss*) > 19 mg/L (material was tested up to its maximum solubility)
- **Daphnia toxicity:** EC$_{50}$ (48 h) static test, water flea (*Daphnia magna*) 5.7 mg/L
- **Algal toxicity:** EC$_{50}$ (72 h) static test, algae (*Pseudokirchneriella subcapitata*) 12 mg/L
- **Toxicity to bacteria:** EC$_{50}$ (3 h):  > 100 mg/L activated sludge
- **Bird toxicity:** LD$_{50}$ Japanese quail  > 3160 mg/kg

**Diuron:**

- **Fish toxicity:** LC$_{50}$ (96 h) rainbow trout (*Onchorhynchus mykiss*) 14.7 mg/L
- **Daphnia toxicity:** EC$_{50}$ (48 h) water flea (*Daphnia magna*) 1.4 mg/L
- **Algal toxicity:** IC$_{50}$ (96 h) green algae (*Desmodesmus subspicatus*) 0.022 mg/L
- **Toxicity to bacteria:** EC$_{50}$:  3080 mg/L
- **Bird toxicity:** Dietary LC$_{50}$ (8 day) bobwhite quail  1730 mg/kg diet

**Environmental fate, persistence and degradability, mobility**

Thidiazuron is not readily biodegradable < 17%. It is strongly adsorbed by soil. DT$_{50}$ in soil is about 26-44 days (aerobic); 28 days (anaerobic).

Diuron is not readily degradable. The duration of activity of diuron in soil is about 4 to 8 months. DT$_{50}$ is 90 to 180 days.
13. DISPOSAL CONSIDERATIONS

Triple or preferably pressure rinse container before disposal. Add rinsings to spray tank. Do not dispose of undiluted chemicals on site. If recycling, replace cap and return clean containers to recycler or designated collection point. If not recycling, break, crush or puncture and bury empty containers in a local authority landfill. If no landfill is available, bury the containers below 500 mm in a disposal pit specifically marked and set up for this purpose clear of waterways, desirable vegetation and tree roots. Empty containers and product should not be burnt. Dispose of waste product through a reputable waste contractor.

This MSDS summarises our best knowledge of the health and safety hazard information of the product and how to safely handle and use the product in the workplace. Each user should read this MSDS and consider the information in the context of how the product will be handled and used in the workplace including in conjunction with other products.

If clarification or further information is needed to ensure that an appropriate risk assessment can be made, the user should contact this company.

Our responsibility for products sold is subject to our standard terms and conditions, a copy of which is sent to our customers and is also available on request.
